

**Pacific Northwest National Lab  
Presents**

# Career Connections- Igniting your Career at a National Lab

High school students: What if you could discover dark matter, help thwart cyberattacks, or unlock the mysteries of Earth's climate—improving humanity for generations to come?

We invite you to join "Career Connections—Igniting Your Career at a National Lab," where top scientists and engineers will share their personal experiences at PNNL, including groundbreaking projects and how they're making a national and global impact in science, energy, and national security.

From October 18 to 21, our team of scientists and engineers will lead information sessions and answer your questions about their work and working at PNNL.

**Monday, October 18**

***Register before October  
14 via the QR Code***
